Subject: Mirant Plant - Alexandria
Dear Mr. Darton -

I am writing in connection with the upcoming review by the DEQ and Air Pollution Control Board of the Mirant permit. I urge you to adopt the most stringent requirements for the Mirant Plant, ensuring that it will be required to adopt the very best and most effective technologies resulting in cleaner air for Alexandrians.

It makes no sense that an outdated coal burning plant should be so close to thousands of Virginia residents, much less a plant that does not provide energy to VA residents and has a long history of noncompliance and disregard for the environment and public safety.

Thank you.
